Pondicherry, India

SUMMARY

UI-focused Product Designer with a foundation in visual design and a working understanding of UX principles. Focused on creating clear, structured interfaces that balance aesthetics, usability, and real product requirements. Skilled in translating user flows and product needs into polished, scalable UI systems beyond surface-level visuals. Brings hands-on experience from freelance work and early-stage startup environments, with a practical, detail-oriented approach to interface execution and collaboration.

EXPERIENCE

Freelance UI Designer — Remote -Project-based | Apr 2021 – Present
DDM Town

- Designed responsive web and mobile interfaces for startups and personal brands across multiple industries.
- Created layout systems, visual styles, and reusable UI components aligned with product requirements.
- Delivered high-fidelity UI, prototypes, and basic design systems ready for development.
- Worked directly with clients to gather requirements and translate ideas into structured interface designs.
- Managed feedback cycles and revisions while maintaining visual consistency and usability.

Junior UI/UX Designer (Intern) | Sep 2022 – Feb 2023
EMinds AI

- Assisted senior designers in redesigning web and product interfaces to improve visual consistency and usability.
- Created wireframes, UI mockups, and supporting design assets using Figma and Adobe XD.
- Contributed to onboarding flows and basic interaction improvements for clearer user navigation.
- Participated in design reviews, sprint discussions, and developer handoffs.
- Supported asset organization and layout refinement for production-ready UI.

Product Designer (UI-Focused) — Remote | Dec 2024 – Jan 2025
Stealth Startup, South Korea

- Designed mobile-first user interfaces with emphasis on visual clarity, hierarchy, and consistency across screens.
- Translated product requirements and existing user flows into wireframes and high-fidelity UI using Figma.
- Built reusable UI components and supported early design system setup for the MVP.
- Collaborated closely with developers and stakeholders to ensure smooth handoff and feasible implementation.
- Iterated on interface designs based on feedback within a fast-moving startup environment.

EDUCATION

Bachelor of Technology (B.Tech) — Information Technology | 2019 – 2023
Manakula Vinayagar Institute of Technology
